

### **PictureSize**

15 January 2014

### **Page setup for pictures size and what options should be used.**

The first Picture link is for the News Item and Thumbnail by side of article.

The Thumbnail is just a crop of the news item picture. Use the crop thumbnail options to get the picture.

The news item is the picture that sits in the actual item. To fit with website it should be long and thin, but we do have the room for square pictures.

The Latest News picture link is for picture that appears when you go to news section. This can be a different picture, this one should be a long thin picture if possible.
